Joanna Sharman is the Senior Database Developer for the International Union of Basic and Clinical Pharmacology (IUPHAR)/British Pharmacological Society (BPS) Guide to Pharmacology database (http://www.guidetopharmacology.org) based at the University of Edinburgh in the UK. She specialises in biological and chemical data management and development of open access software and websites. She is also interested in developing methods for enabling citation of data stored in databases. One of the projects she is involved in automates the extraction of data from the Guide to Pharmacology database for publication in the biennial Concise Guide to Pharmacology issue of the *British Journal of Pharmacology*.

Dr. Sharman obtained a B.Sc. in Natural Sciences from the University of Birmingham, and an M.Res. from the University of York and a Ph.D. from the University of Edinburgh in Bioinformatics. Her Ph.D. work developing novel computational tools for visualisation of data relating to the malaria parasite led to her being awarded the “Young Bioinformatician of the Year” prize at the BioSysBio 2007 conference in Manchester, UK.
